8.2 Exposure controls

Appropriate engineering controls:

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use or handling.

When handling wire such as in winding operations, safety glasses with side shields and protective gloves should be worn.

Welding, brazing, soldering or hot staking should be done under a fume hood or in a room with adequate ventilation to prevent respiratory irritation.

If the wire is mechanically stripped, the dust should be contained and not allowed to enter the room air.

Respiratory protection:

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn.

Protection of skin:

Select glove material impermeable and resistant to the substance.

Wear appropriate clothing to prevent any possibility of skin contact.

Eye protection:

Safety glasses or goggles are appropriate eye protection.

General hygienic measures:

Wash hands before breaks and at the end of work.

Avoid contact with skin, eyes and clothing.

10 Stability and reactivity

10.1 Reactivity: Does not react under normal conditions of use and storage.

10.2 Chemical stability: Stable under normal conditions of use and storage.

10.3 Possibility of hazardous reactions:

Rapid polymer decomposition temperatures start at 400-500 °C. Under normal conditions and temperatures, the insulated wire is unreactive. However, the dust from stripping the insulation may react violently with inorganic acids and alkalis.

When burned, soldered, hot staked, welded or bonded, magnet wire may give off toxic decomposition products which may cause eye and/or respiratory irritation. These decomposition products may include one or more of the following: carbon monoxide, carbon dioxide, cresol, phenols, nitrous oxides, formaldehyde*, toluene diisocyanate*, and methylene dianiline.

Acute exposure to metal fumes may cause irritation of the respiratory tract and /or metal fume fever with symptoms of fever, chills, nausea, chest tightness or metallic taste. Exposure to isocyanates may cause a chemical sensitivity.

If mechanical abraded, maintain nuisance dust levels below regulatory levels.

10.4 Conditions to avoid: None known.

10.5 Incompatible materials: None known.

10.6 Hazardous decomposition products: None known.
